

MCR Green Officer

Elre Oldewage

I'm a first year PhD student in Engineering. Though it is only my first year at Cambridge, I am passionate about gardening, sustainability and all things green.

Churchill already has a strong record of good environmental practices and was awarded a Platinum Impact award in 2018. As MCR Green Officer I aspire to:

- Continue improving Churchill Colleges already-excellent environmental practices.
- Promote environmental issues within the MCR.
- Work with the Environmental and Ethics Officer in the JCR to promote environmentally sustainable practices within Churchill College.
- Be actively involved in running the greenhouse.
- Ensure that the raised garden beds are well-cared for and are planted with seasonal veggies so that members of the gardening society can taste the fruits of their labour.
- Organize events related to gardening and green practices.
