

Belquis and Sruthi for Academic Officers

Elevating Academic Excellence: A Manifesto for Change

Outreach at Cavendish

Engineering Open Days Outreach

Our Initiatives

Pints of Churchill & Collegiate Discourse Fiestas

Upgrading CHUTalks to **regular dynamic and engaging events** organised in our own MCR Room. With **discussions** and **friendly debates** on a wide range of research topics (**Pints of Science/Philosophy/Art**) and **hands-on demos** showcasing brilliant academic works of our community!

Including Joint Events with the SCR (Fellows)

Workshops & Lecture Series

Dynamic workshops on productivity tools such as Notion, tips on mastering publications in different domains, and decoding academic politics. Learn to navigate fellowships and entrepreneurial funding with **guidance from community experts**.

ECR Day & Gala Dinner

Celebrating our academic community's early career researchers (ERC) in a **symposium** consisting of posters, **networking breakouts**, **talks**, **data blitz** and a **Gala Dinner** featuring our loved **2-minute thesis** presentations.

Coordinating Efforts to Improve Event Publicity in Churchill

About Us

Hi! This is Bel and Sruthi, and we're super excited to be running as your academic officers this year! We are both third-year PhD students in engineering working on bioelectronics and neuroimaging research. In our free time, we enjoy giving back through outreach! We love Churchill, and we've both been part of academic events held here (2-minute thesis & Conference of Everything).

We've known each other for about a year, and we both share the same vision of how we'd like to elevate our academic events at Churchill. We're very excited to meet everyone in Churchill and hopefully at a few academic events as well!

Our Goals

- We aim to **keep running** well-loved Churchill events like the Conference on Everything and the Two-Minute Thesis Competition
- We want to **foster a stronger sense of community** both within the MCR and also between the MCR and the SCR
- Provide **academic and professional development** opportunities for MCR members
- **Have fun** presenting research to broad audiences and learning about your fellow MCR members' work!
